

Special Issue

Sustainable Supply Chain Management in the Post-Pandemic World

Message from the Guest Editors

The COVID-19 pandemic has had a severe impact on supply chain networks. Many industries were impacted by global scaled shutdowns and workforce losses or interruptions. Despite a shortage in global trade in 2020, the total trade value of goods and services has been on the rise in post-pandemic world trade. The SI welcomes theoretical and application-oriented works which address the pre- vs. post-pandemic issues observed and investigated in broad sustainable supply chain management topics. Works focusing on the relationship between supply chain management and the UN SDGs, Industry 4.0, Digitalization are especially welcome. Topics include:

The pandemic's impact on:

An individual country's or region's status of supply chains and logistics; comparative study of multiple countries or regions; industry 4.0 maturity and adoption performance in select industries; economic, environmental, or social footprints; trade regulations and supply chain management practices; make or buy decisions; inventory management practices; supplier selection; supply chain design; strategic decision making in supply chain management; logistics applications...

We look forward to your submissions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
