

## Special Issue

# Innovative Industrial Policies for Sustainable Development: Challenges and Opportunities

### Message from the Guest Editors

This issue discusses policy making's role in fostering sustainable industrial growth and innovation, potential policy implications and practical applications of research findings in real world. It focuses on understanding how strategic policies drive industries towards more sustainable practices and promoting technological advancements and economic development (digital transformation, its role in sustainable development, and importance of circular economy principles in industrial policies...) The scope is multifaceted, including topics pivotal to the discourse on industrial and innovation policies and sustainable development, and its interdisciplinary nature makes us very hopeful to attract contributions from fields like environmental science, economics, and technology studies.

The Issue builds upon the existing literature by manufacturing current research on industrial and innovation policies with sustainable development outcomes, aiming to fill any gaps by exploring the synergies and challenges in policy implementation across different sectors and economies. It will provide a comprehensive update on state of sustainable industrial policies and innovation strategies.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
