Circular Economy Transformations in the Production and Consumption System: Critical Issues and Emerging Perspectives under the Scope of the Sustainable Development Goals

Message from the Guest Editors

In recent years, the academic discourse on the transition from a linear to a circular economy model has pursued meaningful mechanisms for shared analytical frameworks and metrics at the interface between the economy and the environment. Circular and bio-based efforts to transform production–consumption systems and minimise environmental impacts are built around overarching principles of sustainability, waste valorisation, and ecosystem conservation. In an attempt to contribute to this direction, we welcome both theoretical and empirical contributions in line with a multidisciplinary approach, which may collectively provide up-to-date, fruitful, and actionable insights on pressing issues relating to relevant trends, developments, or critical aspects that warrant both scholars' attention, as well as the consideration of both decision makers and practitioners.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
