Special Issue

Mobility Planning for Healthy and Sustainable Cities

Message from the Guest Editor

Planning plays a central role in many aspects of population health. One such aspect is the ways in which mobility can affect health and the sustainability of cities. This Special Issue aims to bring together researchers studying the nuanced relationship between mobility and general health and welfare. Topics for submissions could include sustainable urban mobility, the impact of urban design on travel behavior, or technological innovations in transportation that lead to attaining sustainability or health goals, as well as other topics that fit with the scope of this Special Issue. While research has been presented on these topics separately, a Special Issue that combines these topics in a central, easily accessible journal outlet would be beneficial and unique.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
