

Special Issue

The Making of a Culture of Responsible Consumption and Production: The Role of Artificial Intelligence and Human Subjects in the Transition Towards a Circular Economy

Message from the Guest Editors

We are pleased to announce a new Special Issue of *Sustainability* entitled "The Making of a Culture of Responsible Consumption and Production: The Role of Artificial Intelligence and Human Subjects to Transition Towards a Circular Economy", focusing on the dynamic interplay between human actors—consumers and producers—and Artificial Intelligence (AI) in shaping a culture of responsible consumption and production (RCP). As lifestyles and daily practices increasingly influence the transition toward sustainable economies, this issue seeks to explore how AI-enabled systems can foster, transform, or challenge these practices. We welcome multidisciplinary contributions that examine the co-creative—and sometimes co-destructive—roles of AI in sustainable consumption and production ecosystems.

- artificial intelligence
- circular economy
- culture
- practices
- responsible consumption and production
- sustainability

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon
School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
