

Special Issue

Achieving Sustainability in Safety Management and Design for Safety

Message from the Guest Editors

This Special Issue will explore how safety management can evolve to meet sustainability demands while addressing the growing risks associated with urbanisation, industrial activities, and environmental hazards. Integrating safety practices with sustainable development goals is crucial to ensuring long-term resilience in a rapidly changing world. This collection will examine critical safety challenges, ranging from proactive risk assessments to emergency response strategies, and emphasise the importance of sustainability in both immediate risk mitigation and long-term hazard prevention. This Special Issue will cover a wide array of themes, including occupational and environmental hazards, complex disaster scenarios, vulnerability analysis, and the design of safety frameworks that focus on reducing risks in the short term and ensuring sustainable practices that promote resilience. This Special Issue will adopt a systems-oriented approach, encompassing safety across multiple settings, including urban infrastructure, workplaces, homes, communities, and high-risk industries such as chemical production and disaster management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
