

## Special Issue

# The Current Practices and Future Directions of Sustainable Digital Transformation

### Message from the Guest Editors

Due to the fourth industrial revolution, also known as IR 4.0, businesses are forced to make the transition to digitalization. Sooner or later, many more organizations will begin their digital transformation, and during this process many of these organizations will adapt, obtaining new skills and competencies, develop new jobs and positions, change their organizational structure, implement new technologies in their processes, products, and services, change their functional activities, and move to new business models. In a nutshell, a new digital business ecosystem is emerging, and all organizations must participate to survive and flourish. In this Special Issue, we plan to share relevant experiences to shed light on the way forward, providing other organizations with insights and recommendations for the future. Full research papers, case studies, and conceptual frameworks on current and emerging topics related to digital transformation are all welcome. Potential topics include (but are not limited to): digital transformation  
digital business  
digital entrepreneurship  
digital competencies  
digital strategy

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
