

Special Issue

Applications of Remote Sensing and Artificial Intelligence in Land Cover Mapping and Ecosystem Monitoring

Message from the Guest Editors

Remote sensing has changed the way we view and study the Earth's surface in a very cost- and time-effective manner. The synergistic application of remote sensing techniques with artificial intelligence (AI) and machine learning (ML) amplifies its effectiveness, allowing for automated and precise analysis of satellite and aerial imagery. This improves the detection of land cover changes, water quality, and other ecosystem changes, as well as the prediction of environmental trends, thus offering invaluable insights for the sustainable management of natural resources and transforming the way we map land cover and evaluate ecosystem health. This Special Issue considers remote sensing techniques in combination with AI and machine learning in detecting and monitoring landcover and land use changes, as well as ecosystem dynamics, especially in the context of climate change and anthropogenic activities.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
