

Special Issue

Sustainable Development Goals in a Human-Centered Cyber-Physical Society

Message from the Guest Editors

In 2015, the United Nations (UN) ratified 17 Sustainable Development Goals (SDGs) UN SDG Summit, where they raised awareness of global challenges. The impact on organizations in this context is to share common goals and plan environmentally sound business activities, with global perspectives, from the outset so as to achieve sustainability in the true sense, and in some instances to restructure the business.

The overall objective of this issue is therefore to investigate humanizing design experiences that may be intangible, but very powerful. It must be considered that design is executed for the impactful human experience by ensuring that a human-machine engagement is as easy and emotionally connected as a conversation between two friends. The implementation of the Society 5.0 vision therefore might simultaneously yield social, economic, and ecological benefits that enhance a society's sustainability and stability. This Special Issue will investigate these aspects as it relates to sustainable development goals in a human-centered cyber-physical society.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
