

Special Issue

New Business Models for Sustainable Corporate Management: From CSR to ESG

Message from the Guest Editor

This Special Issue focuses on research and review articles on the nexus among ESG (environmental, social, and corporate governance), CSR (corporate social responsibility), corporate governance, green finance, sustainable urbanization, and other topics related to the new business models for sustainable corporate and urban management to achieve the United Nations' 17 SDGs (sustainable development goals). To cope with the challenges such as global warming, enterprises are playing an increasingly important role. If we plan to achieve the SDGs, it is essential to open a new file for green projects and scale up the financing of investments that provide environmental benefits through new financial instruments and new policies, creating new business models for sustainable corporate management. The transition from CSR to ESG will provide rich opportunities for industry and academia to go hand in hand to explore this new source of growth engine, thus leaving a gap to fill in this Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
