# New Business Models for Sustainable Corporate Management: From CSR to ESG

## Message from the Guest Editor

This Special Issue focuses on research and review articles on the nexus among ESG (environmental, social, and corporate governance), CSR (corporate social responsibility), corporate governance, green finance, sustainable urbanization, and other topics related to the new business models for sustainable corporate and urban management to achieve the United Nations' 17 SDGs (sustainable development goals). To cope with the challenges such as global warming, enterprises are playing an increasingly important role. If we plan to achieve the SDGs, it is essential to open a new file for green projects and scale up the financing of investments that provide environmental benefits through new financial instruments and new policies, creating new business models for sustainable corporate management. The transition from CSR to ESG will provide rich opportunities for industry and academia to go hand in hand to explore this new source of growth engine, thus leaving a gap to fill in this Special Issue.
