

Special Issue

Emerging Pollutants, Atmospheric Processes, Urban Heat Islands and Integrated Environmental Observations: Advances in Remote Sensing and Analytical Techniques

Message from the Guest Editors

The rapid pace of urbanization, industrial activity, and climate change has led to growing concerns over the presence and impacts of emerging pollutants in both atmospheric and aquatic environments. These pollutants, often unregulated or insufficiently monitored, pose significant risks to human health and ecosystems. This Special Issue aims to bring together cutting-edge research that integrates remote sensing, advanced laboratory techniques, and multidisciplinary analytical approaches to investigate emerging pollutants, atmospheric dynamics, and urban heat islands. We encourage submissions that address novel methods of detecting and quantifying pollutants using high-end techniques, such as gas chromatography, liquid chromatography, ICP-MS, TXRF, and micro-FTIR, as well as remote sensing technologies including DOAS, ACTRIS-based observations, and aerial or satellite-based monitoring. Contributions related to urban climate analysis, land surveys, bathymetry, and data integration from multiple environmental compartments are also highly welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
