Challenges and Prospects of Sustainability in the Context of Global Health

Message from the Guest Editors

We have the opportunity and the pleasure to invite you to contribute to our Special Issue on “Challenges and Prospects of Sustainability in the Context of Global Health”. The recent COVID-19 pandemic underlined once more the global interrelatedness of all our activities. A regionalized, even fragmented world—as it was—is converging rapidly at the beginning of the 21st century. Countries embark increasingly on global arrangements and a globalizing civil society connects across borders, supported by mobile technologies. At the same time, unprecedented waves of migration diversify the Northern societies, depleting the qualified workforce in the South. Global health is an area for study, research, and practice that places a priority on improving health and achieving equity in health for all people worldwide. It emphasizes transnational health issues, determinants, and solutions; involves many disciplines within and beyond the health sciences; and is a synthesis of population-based prevention with individual-level clinical care.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
