

Special Issue

Tourism Sustainomics: Ecological and Economic Pillars, with Stakeholder and Political Implementation for Sustainable Development

Message from the Guest Editors

We are pleased to invite submissions for a Special Issue dedicated to advancing the emerging field of Tourism Sustainomics. This issue seeks to enhance our multidisciplinary comprehension of sustainable tourism development by exploring the dual framework of what needs to be sustained within tourism and how it can be effectively implemented. Tourism Sustainomics bridges sustainability theory and practical development in tourism, encompassing ecological, economic, stakeholder, and political dimensions to promote a comprehensive approach to sustainable tourism. This meta-science framework combines robust theoretical foundations with actionable approaches, engaging all stakeholders in effective policy, governance and management practices. The scope of this Special Issue is structured around the dual framework of Sustainable Tourism Development: three sustainability pillars that cover economic and ecological dimensions, and stakeholders' and political implementational dimensions. We welcome contributions that provide theoretical insights and propose innovative solutions pertinent to sustainable tourism development and its underlying values.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
