

## Special Issue

# Ecology and Environmental Science in Sustainable Agriculture

### Message from the Guest Editor

Sustainable agricultural production includes both intensive and extensive methods of producing crop and livestock products with minimal impact on the environment. We encourage authors to demonstrate specific ways to optimize agricultural production in their articles to minimize its impact on the environment. The purpose of this Special Issue is to demonstrate the possibility of optimizing already well-known agricultural production processes, taking into account their minimal impact on the biological diversity of the planet or local biodiversity in a particular area. The editorial board of the journal hopes to attract authors to this Special Issue who will try to look at organisms that have already been well studied and adapted to agricultural production from a slightly different angle: (1) from the point of view of minimizing the impact of technological processes on these living organisms and (2) from the point of view of minimizing the negative impact of agricultural production on living organisms and landscapes in the surrounding areas.

### Guest Editor

Dr. Viktor Brygadyrenko

Department of Zoology and Ecology, Oles Honchar Dnipro National University, Nauky Avenue 72, 49045 Dnipro, Ukraine

### Deadline for manuscript submissions

28 February 2026

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario  
Institute of Technology, Oshawa, ON L1G 0C5, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
