

Special Issue

Sustainable Tourism and Use of Natural Resources—Contemporary Practices and Management Challenges

Message from the Guest Editors

This Special Issue focuses on the various ways in which tourism and natural resources relate. It will present analyses of the possibilities and challenges for the successful use of these resources in tourism, based on the principles of sustainable development. We invite authors, scientists, and professionals involved in the theoretical, methodological and practical studies of tourism and natural resources management to contribute articles that will stimulate the understanding and academic promotion of this topic. The multidisciplinary and integrative character will be one of the most appreciated attributes of this proposal, given that this topic usually requires the involvement of experts from several branches of science. The Special Issue is characterized by a wide scope, so all research presenting conceptualization or empirical work from various areas of knowledge on the use of any kind of natural resources by tourism is welcome. All issues related to the socioeconomic and environmental aspects of the use of natural resources in tourism, as well as to the various obstacles, challenges and negative effects of their use, are also welcome in this Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
