

Special Issue

Sustainable Management of Tourism in Coastal Metropolitan Areas

Message from the Guest Editors

The main goal of this Special Issue is to provide an up-to-date report on the state of the art of all aspects related to the management of tourist activity in coastal metropolitan areas. The complexity of tourism planning and management in coastal urban areas makes it necessary to design tools that help create sustainable management models that avoid the negative impacts produced by tourism. Original research articles and reviews in this Special Issue may include (but are not limited to) the following: planning and management of tourism in coastal metropolitan areas; characteristics and analysis of blue tourism; evaluation tools for tourism in urban areas; the environmental, economic and social impact of tourism in these areas; the effects of climate change on tourism in coastal areas; territorial transformations caused by tourism in metropolitan areas; the use of coastal heritage for tourism; and overtourism, among other topics. We look forward to receiving your contributions. Prof. Manuel Arcilla Garrido

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
