

Special Issue

Advancing Sustainability in the Food Industry: The Role of Certification Schemes and Management Systems in Building Trust Within Circular Economy Initiatives

Message from the Guest Editor

The circular economy (CE) has become a crucial issue worldwide due to legal and corporate requirements. The transition from a linear to a more circular economy is an ongoing process. In the food sector, CE can be supported at the organizational level by standards developed for this purpose, such as the ISO 59000 series. Additionally, other standards and certification schemes also significantly contribute to CE or support its implementation.

Certification plays an important informational role in communication both between organizations within the supply chain and with food consumers. The implementation process and certification of the aforementioned requirements may vary significantly depending on the approach of individual organizations.

This Special Issue covers research on topics such as food and environmental management system certification that supports CE, sustainable communication within the supply chain, and the credibility and trust value of these actions.

- Food certification
- Circular economy
- Sustainable production
- Management systems
- Environmental management systems
- Food quality

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
