

Special Issue

Impact of Ecological Network Structure on Ecosystem Dynamics and Function

Message from the Guest Editor

Dear Colleagues: This Special Issue aims to promote scientific communication and discussion about the impact of the ecological network structure on ecosystem dynamics and function. The systems studied for this Special Issue mainly include interaction networks, ecological network structures, ecological network dynamics, and the effects of ecological networks on ecosystem dynamics and function. Research conducted on other types of ecological networks is also welcome. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: 1) The dynamics of interaction networks in all types of ecosystems. 2) The structure and dynamics of ecological networks under human impacts, such as climate change and pollution. 3) The relationship between ecological network structures and ecosystem function and stability. 4) Reviews on ecological network research and analyses. I look forward to receiving your contributions. Prof. Dr. Hui FU

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
