

Special Issue

Driving Sustainable Development Through Supply Chain Transformation

Message from the Guest Editors

Global supply chains are at a critical juncture. Facing unprecedented pressures from climate change, resource scarcity, evolving regulations, and heightened consumer demand for ethical practices, traditional linear supply chains are no longer able to serve the same functions as before. The aim of this Special Issue, therefore, is to explore and advance the paradigm shift towards sustainable supply chain models that serve as a powerful engine for achieving the United Nations' Sustainable Development Goals.

The central aim of this Issue is to collate cutting-edge research that moves beyond incremental improvements and investigates transformative strategies instead. We seek to publish studies that provide robust theoretical frameworks, empirical evidence, and actionable insights into how supply chains can be redesigned to create positive environmental, social, and economic value. We encourage submissions that address the systemic nature of this transformation, including the role of digital technologies, cross-sector partnerships, innovative business models, and disruptive policy frameworks.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
