

## Special Issue

# Environmental Effects and Remediation of Soil Pollution

### Message from the Guest Editor

Soil contamination is a growing worldwide problem affecting all the living organisms. Numerous compounds with different physical and chemical properties have been detected in soil, posing serious health risks to humans. Recently, utilization of sustainable remediation techniques, such as bio- and phyto-remediation, has been attracted more interest. The main scope of this Special Issue includes laboratory and field scientific research, or review papers relating the effectiveness of soil remediation techniques, with an emphasis on the fate of the pollutants, prevention, and remediation of soil pollution through the remediating process. In this respect, research areas may include (but are not limited to) the following:

- Environmental fate of the pollutants;
- Soil pollution indicators, assessment, and management;
- Soil pollution;
- Soil remediation;
- Soil amendment;
- Heavy metal (im)mobilization;
- Phytoremediation;
- Phytoextraction;
- Plant toxicology;
- Soil microorganisms in remediation.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
