

## Special Issue

# Energy Storage Technologies for a Sustainable Future

### Message from the Guest Editors

As the world transitions towards cleaner energy, energy storage plays a crucial role in providing flexibility, stabilising intermittent generation resources, improving grid stability, and alleviating transmission congestion. Therefore, this Special Issue aims to compile innovative research on challenges and opportunities in energy storage. We welcome papers focusing on market mechanisms, regulation, strategic behaviour, and the operation of storage systems including batteries, hydrogen, hydro reservoirs, and pumped storage, among other technologies. Authors are encouraged to explore market integration and operational strategies for both large-scale and distributed storage systems, either in combination with non-dispatchable generation or as stand-alone solutions, considering the social and economic aspects involved.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
