Special Issue

Energy Efficiency in Building and Energy Balance

Message from the Guest Editor

With the development of technologies related to distributed energy resources, ICT, and artificial intelligence, buildings have become energy prosumers; not only consumers, but also producers. The process of energy conversion and energy efficiency in buildings has become more important. Different methods for balancing energy supply and demand in buildings in sustainable and efficient ways should be researched. To achieve a more sustainable and efficient building from an energy point of view, there are many complex challenges in analyzing the energy balance of the building, installing energy infra and energy management systems, implementing proper algorithms, and ensuring users' comfort in a building. In response to such challenges, it is necessary to investigate building physics, emerging technologies in buildings, building energy balance assessment, techno-socio-economic analysis of the building, and related technologies. This Special Issue will target diverse prospects in the energy efficiency in building and energy balance. This issue covers global, regional, national, and local topics and integrates social, economic, technical, and environmental approaches.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
