

## Special Issue

# Advances in Nature-Based Solutions for Sustainable Green Buildings

### Message from the Guest Editors

This Special Issue covers “Advances in Nature-Based Solutions for Sustainable Green Buildings”. The focus is both on nature-based building materials and nature-based building-related technologies and systems, such as green roofs and vertical greening systems. Research with the potential to contribute to a wider adoption and documentation of nature-based solutions for sustainable green buildings is also welcomed, as long as it is within the general scope of the journal *Sustainability*. The latter can include, but is not limited to, research that takes an economic, legislative or LCA/LCCA perspective, as well as practically oriented research, e.g., related to irrigation, maintenance, case studies, etc.

### Guest Editors

Prof. Dr. Amaryllis Audenaert

Research Group BEAST (Built Environment Assessing Sustainability),

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
