

Special Issue

Monitoring of Environmental Matrices: New Scenarios and Future Perspectives

Message from the Guest Editors

We are organizing a Special Issue of Sustainability entitled “Monitoring of Environmental Matrices: New Scenarios and Future Perspectives”. This Special Issue welcomes papers highlighting the effectiveness and the challenges of monitoring activities in different fields. We believe that the scientific contributions from cultural fields of different origins are highly effective for the development and promotion of research and innovation in the conservation, protection, and requalification of the environment. In this context, we promote multidisciplinary and interdisciplinary studies on monitoring issues aimed at the prevention of environmental damages, the protection of ecosystems, the integrated and sustainable management of resources, even focusing on strategies and actions for reducing climate change impacts, including the development of policies for land use governance. Moreover, the integrated monitoring activity by scientists of different backgrounds allows a better understanding of the response of the environment to multiple stressors.

Guest Editors

Prof. Dr. Daniela Ducci

Dr. Fabrizio Carteni

Dr. Luigi Rosati

Dr. Federica Dell'Acqua

Dr. Stefania Stevenazzi

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
