

Special Issue

Ecology, Biodiversity and Sustainable Conservation

Message from the Guest Editors

It is imperative to conduct an in-depth discussion of ecological principles, an assessment of the current status of biodiversity, and an exploration of sustainable conservation strategies, as these issues have become urgent matters of common concern for the global scientific community, policy makers, and all sectors of society. To achieve this objective, this Special Issue will collate the most recent research findings and forward-thinking perspectives from the fields of ecology, environmental sciences, biological conservation, and social sciences. The theme of 'Ecology, Biodiversity and Sustainable Conservation' will be the focus of discussion, encompassing ecosystem functions and services, biodiversity assessment and monitoring, species conservation strategies, climate change and biodiversity, sustainable resource management, and the relationship between human activities and biodiversity. We extend an invitation to experts, scholars, researchers, and practitioners to contribute to this conference by sharing their high-quality work in the form of original research articles, best practices, and critical reviews.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
