

Special Issue

Intelligent Systems and Consciousness Society: Sustainable Transportation and Decision Making

Message from the Guest Editors

Intelligent Systems are a key pillar in state-of-the-art research and technology to improve the quality of life of all citizens. The scope of this Special Issue is to elaborate novel solutions in augmented Intelligent Decision Making, and in the planning and design of urban road networks, motorways and transport hubs, within the framework of ITS, Cooperative Intelligent Transport Systems (C-ITS) and smart cities, thus empowering consciousness and improving decision/policy making in the above areas. This Special Issue aims to bring together theoretical and empirical studies aiming to enhance system sustainability, intelligence, safety and security, while reducing the environmental, social and economic impacts. We invite papers that address (but are not limited to) the integration of augmented Intelligent Decision Making, augmented policy making, ITS and C-ITS in dynamic transport and traffic systems, traffic management, traffic congestion, logistics and supply chain management, smart cities and communities, safety and security, communications, digital data management (big data and IoT) and environmental and health impacts.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
