# **Special Issue**

# UAV Remote Sensing, Precision Agronomy, and Resource Optimization Strategies

# Message from the Guest Editors

This Special Issue focuses on integrating remote sensing inversion, machine learning, and AI to monitor crop stress (e.g., pests, drought) and growth in staple crops like soybean and rice using UAV, satellite, and IoT technologies, while developing data-driven models to optimize sowing, fertilization, and irrigation for resource efficiency. It also explores multi-scale modeling and disaster early-warning systems by merging physicsbased and data-driven approaches to analyze yield variability, assess climate risks (e.g., heatwaves), and support agricultural policies. The issue seeks original research on crop parameter retrieval, Al-powered precision management, multimodal pest detection, and climate-adaptive strategies to bridge theoretical innovation and practical applications in intelligent agriculture. Topics of interest include, but are not limited to, the following:

- UAV/satellite-based retrieval of crop biophysical parameters;
- Early diagnosis of crop stresses;
- Al-driven precision fertilization and irrigation decision systems;
- Agroecosystem dynamic monitoring;
- Agricultural adaptation strategies;
- Crop growth modeling and yield prediction;
- Crop phenotyping analysis;

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

# Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
