# By-Products of the Agri-Food Industry: Use for Food Fortification

### Message from the Guest Editors

Nowadays, the agro-food industry generates high amounts of byproducts that may possess added-value compounds with high functionality and/or bioactivity. At the same time., consumers' demand for healthier foodstuffs has increased over the last years; thus, the food industry has strived to answer this challenge. Byproducts are generally secondary products derived from primary agro-food production processes and represent an exciting and cheaper source of potentially functional compounds. Functional foods" are defined as foods that, through the incorporation of bioactive compounds, can be shown to exert health benefits beyond the intrinsic nutritional effect. Adding bioactive compounds to staple foods, such as pasta, bread, biscuits, beverages, fats, etc., represents an opportunity to produce fortified foods to promote a healthier diet, without requiring consumers to change their dietary habits.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
