

Special Issue

Sustainable Management for the Future of Education Systems

Message from the Guest Editor

The 2030 Sustainable Development Goals Outcome Document of the General Assembly contains 17 global goals and 169 corresponding targets. Sustainable management is an approach to managing resources and processes that balances economic, social and environmental factors to ensure long-term sustainability. In this Special Issue we focus on managing resources and processes for the future of education systems. We are interested in the results of studying any concepts, functions, methods, etc. of modern management that balances economic, social and environmental factors in educational systems. The scope may include (but not limited to) the following:

- Interdisciplinary approaches to the management of sustainable education;
- Global challenges and their impact on sustainable education;
- The role of artificial intelligence and digital technologies in the development of sustainable education;
- The influence of government policies and economic and ethical factors on the sustainable management of education and science.

We invite you to contribute high-quality research articles, reviews, communications and concept papers, pertaining to a topic relevant to the Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
