# **Special Issue**

# Sustainable Logistics Systems: The Impacts of Artificial Intelligence and Combinatorial Optimization

## Message from the Guest Editors

This Special Issue explores how AI and combinatorial optimization can enhance sustainability in logistics by improving efficiency and reducing environmental impact. Key applications include carbon-aware vehicle routing, Al-driven decision support, and digital twins, which optimize operations to cut emissions and fuel use. Metaheuristics address complex challenges like load balancing and reverse logistics, promoting circular economy practices. Green supply chain management and lifecycle carbon reduction are central themes, with All and optimization enabling smarter inventory, waste reduction, and energy-efficient transport. These technologies help build resilient, low-carbon supply chains, aligning logistics with global sustainability goals. We invite original research on topics such as fleet electrification, Al-enhanced heuristics, predictive maintenance, circular economy integration, and realworld policy impacts. The issue highlights how technological innovation can drive eco-friendly logistics in a climate-critical era.

# **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
