

## Special Issue

# Ecosystem Sustainability Through Biodiversity Protection and Conservation Strategies

### Message from the Guest Editor

The planned Special Issue will be focused on the modern concepts and strategies for the assessment, measurement, and management of the bioresources on our planet. The main goal is to avoid the overexploitation of resources, which may lead to an imbalance in the ecosystems. Recent technologies allow for the precise monitoring of the ecosystems and for gaining a big amount of data. Contributions concerning biodata acquisition, the methodology for the analysis of resources, computations in the field of biomanagement, spatial distribution models, new trends in taxonomy and systematics, citizen science, morphometrics, food resources, predator–prey interactions, human nutrition trends, diet spectrum, consumption physiology, comparative physiology, resource conservation, adaptation, and biogeography will be welcome in this Special Issue. All forms of contributions which are allowed in the Journal “Sustainability” will be accepted. This Special Issue will contribute to the general knowledge on the planet’s bioresources and will play a role as a platform for gaining new data in the field.

---

### Guest Editor

Prof. Dr. Nikolay D. Natchev

Department of Biology, Faculty for Natural Sciences, Shumen University, 9700 Shumen, Bulgaria

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario  
Institute of Technology, Oshawa, ON L1G 0C5, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
