

Special Issue

Ecosystem Sustainability Through Biodiversity Protection and Conservation Strategies

Message from the Guest Editor

The planned Special Issue will be focused on the modern concepts and strategies for the assessment, measurement, and management of the bioresources on our planet. The main goal is to avoid the overexploitation of resources, which may lead to an imbalance in the ecosystems. Recent technologies allow for the precise monitoring of the ecosystems and for gaining a big amount of data. Contributions concerning biodata acquisition, the methodology for the analysis of resources, computations in the field of biomanagement, spatial distribution models, new trends in taxonomy and systematics, citizen science, morphometrics, food resources, predator–prey interactions, human nutrition trends, diet spectrum, consumption physiology, comparative physiology, resource conservation, adaptation, and biogeography will be welcome in this Special Issue. All forms of contributions which are allowed in the Journal “Sustainability” will be accepted. This Special Issue will contribute to the general knowledge on the planet’s bioresources and will play a role as a platform for gaining new data in the field.

Guest Editor

Prof. Dr. Nikolay D. Natchev
Department of Biology, Faculty for Natural Sciences, Shumen University, 9700 Shumen, Bulgaria

Deadline for manuscript submissions

28 February 2027

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
