

## Special Issue

# Risk Management and Economic Development of Sustainable Enterprises

### Message from the Guest Editor

We invite researchers to share their studies on the intersection of risk management and economic development from the perspective of sustainable enterprises. Pressing questions include the following: (i) How can businesses navigate the risky landscape of sustainability and simultaneously contribute to long-term economic growth? (ii) How can innovations in risk management or sustainability frameworks align with the goals of companies with economic benefits to society? In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Risk management models and frameworks for sustainable enterprises;
- Corporate sustainability business models and economic impacts;
- Environmental and social risk management for corporations;
- Innovations in sustainability and risk management;
- Corporate risks arising from sustainability regulation, policy, and social pressure.

We look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
