

Special Issue

Food, Insecurity, Consumption and Sustainable Behavior

Message from the Guest Editor

Those exploring the interplay between the described phenomena examined from a cross-national, longitudinal or case-study perspective are particularly encouraged. Case studies and examinations of the links from a historical perspective are also welcome, as is research at a global, state, regional, household, or individual level, employing macro and micro perspectives. Gender, family and generational approaches are also encouraged (including focusing on young people, who are an understudied group concerning these issues). Finally, as the COVID-19 pandemic has disrupted the everyday lives of people around the world, we also encourage the relationships to be studied in the context of the COVID-19 pandemic (e.g., vaccine hesitancy, pandemic preventive behaviors, lifestyles changes as they relate to food, consumption and sustainable behavior).

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
