Advanced Agricultural Economy: Challenges and Opportunities

Message from the Guest Editors

The different sectors of the bioeconomy, specially the agricultural systems, have been considered among the most promising mean to contribute to achieving the targets set by the United Nations's Agenda for Sustainable Development and its Sustainable Development Goals (SDGs). Key topics of interest for publication include, but are not limited to:

- The economic, social and environmental impacts of sustainable agricultural production and consumption on local economy;
- The economics of dematerialization, decarbonisation and adaptation to climate changes of agricultural supply chains;
- The role and impact of bioenergy on the bioeconomy of feedstock production;
- Methodological and analytical frameworks, criteria and indicators for the risk assessment of bioenergy production systems;
- Methodological and analytical scenarios for market evaluation of sustainable agricultural products;
- Methodological and analytical frameworks to assess the feasibility of sustainable agricultural supply chains.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
