

Special Issue

Intelligent Networking for Sustainable Environment and Human-Natural Systems

Message from the Guest Editor

Growing concerns regarding climate change and natural resource degradation have highlighted the necessity of sustainable development, which can only be achieved through a holistic consideration of the social, economic, and environmental dimensions of development. In this context, intelligent networking technologies involving IoT, edge and cloud computing, artificial intelligence, and other advanced technologies can play a crucial role in data collection and analysis, resource optimization, and environmental sustainability. The aim of this Special Issue is to explore the latest research and practical applications of intelligent networking technologies in promoting sustainable development, addressing environmental challenges, and fostering harmonious relationships between humans and natural systems. The Special Issue is expected to bring together researchers from different disciplines to present cutting-edge research, share innovative ideas, and discuss the potential of intelligent networking technologies for promoting sustainable development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
