Special Issue

Innovative Technologies and Strategies in Disaster Management

Message from the Guest Editors

Currently, since it is a difficult task for humans to react to disasters quickly, efforts have been made to recognize and forecast hazards, assess damage impact, and bounce back (or forward) to a new equilibrium. Creating systems to predict, prevent, and efficiently respond to disasters is becoming an urgent priority. In addition, it is necessary to develop effective management strategies and good practices to strengthen communities and cocreate disaster resilience. These technologies are essential in disaster management, enhancing prediction, assessment, and response. Furthermore. since disaster information and data are usually widely distributed and owned by different agencies, efficiently organizing and sharing resources becomes troublesome. Thus, this Special Issue aims to encourage scholars and experts to report on strategies for effectively using innovative technologies in any or all stages of the disaster cycle. This Special Issue seeks to tackle the barriers encountered in utilizing innovative technologies and contribute to discussing and designing policy implications that may improve disaster risk reduction.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
