

## Special Issue

# The Use of Organic Electronics and Soft Nanomaterials in Solar Energy Technology

### Message from the Guest Editors

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Organic solar cells, devices, materials, and simulation;
- Nanomaterials and polymers for solar energy harvesting;
- modeling, simulation, optimization, and performance assessment of organic electronic devices;
- Solar energy storage technologies;
- Solar-based hybrid PV/T systems;
- Solar in technological applications;
- Semi-transparent organic solar cells;
- Solar applications in buildings;
- Maximum power point trackers;
- Reconfiguration of solar PV systems;
- Parameter estimation of PV cells and modules;
- PV design and sizing;
- Nanomaterial selection and optimization for solar cells;
- Synthesis of nanomaterials for solar cells.

We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
