

## Special Issue

# Pro-Environmental Behavior and Environmental, Social and Governance (ESG) Disclosure in Sustainable Business Management

### Message from the Guest Editor

Today, most corporations pay attention to ESG initiatives, and most companies report the positive sides and ignore negative sides of their stories. This leads to issues of selected disclosure; hence, it is important to report those ESG initiatives that have material and high-impact outcomes without hesitation. Ultimately, this approach improves corporate transparency and gains the trust of various stakeholders. Pro-environmental behavior is one of the most reported initiatives in the ESG reports. In this Special Issue, original research articles and reviews are welcome and research areas may include, but are not limited to, the following:

- Pro-environmental behavior;
- Corporate social responsibility;
- Business ethics;
- ESG reporting;
- Authenticity of sustainability reporting;
- Sustainable development goals;
- Green washing;
- ESG ratings;
- ESG performance.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
