

Special Issue

Decoding Plastic Behavior in the Environment Through Analytical Characterization: Current Advances and Perspectives

Message from the Guest Editors

This Special Issue aims to showcase the latest analytical advances in X-ray Photoelectron Spectroscopy (XPS), Fourier-transform infrared spectroscopy (FTIR), Raman spectroscopy, Scanning Electron Microscopy with Energy-Dispersive X-ray analysis (SEM-EDX), and Pyrolysis-Gas Chromatography-Mass Spectrometry (Py-GC-MS) employed to (i) elucidate surface chemical modifications during plastic aging, (ii) compare spectroscopic and imaging methodologies for the qualitative and quantitative assessment of the formation and pollutant loading of MNPs, (iii) explore the ecological consequences from molecular to community scales, and (iv) propose sustainable approaches to the monitoring and removal of microplastics from the environment. Contributions that integrate chemical, physical, and ecological perspectives on MNPs' interaction with the natural surroundings will enrich the existing literature by providing new insights into the monitoring, risk assessment, and mitigation of plastic pollution.

Guest Editors

Dr. Tiziano Di Giulio
Dr. Silvia Fraissinet
Prof. Dr. Elisabetta Mazzotta

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
