

Special Issue

Sustainable Critical Infrastructures: Progresses, Challenges and Opportunities

Message from the Guest Editors

This Special Issue focuses on addressing the sustainability of critical infrastructure modeling through various techniques, such as agent-based simulation, input-output inoperability, system reliability theory, nonlinear dynamics, and graph theory. This Special Issue is mainly targeted at understanding the critical infrastructure behavior and response to disruptions through single and multi-modeling techniques.

However, hybrid modeling techniques, multi-scale analyses, and other realizable innovative approaches are lacking. These include but are not limited to the following themes:

- o Sustainable Development Goals (SDGs);
- o Climate change;
- o Critical infrastructure planning and modeling;
- o Transport demand;
- o Simulation techniques;
- o Sustainable and resilient critical infrastructure policies

Guest Editors

Dr. Niamat Ullah Ibne Hossain

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
