

## Special Issue

# Latest Advances and Prospects in Sustainable Waste Management

### Message from the Guest Editors

This Special Issue aims to provide a comprehensive overview of the latest advances and prospects in sustainable waste management. This Special Issue will disseminate high-quality research and stimulate interdisciplinary discussions. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Recent developments on waste reduction, recycling, and resource recovery methods.
- Innovative technologies and strategies on treatment and recycling practices, including ICT (information and communication technologies).
- Challenges and opportunities for sustainable waste management in developing economic regions.
- Policy and regulatory measures towards sustainable waste management.
- Environmental and health risks assessment related to waste management.
- Incorporating and integrating circular economy concepts in the waste management process,
- Identification and analysis of awareness-raising activities to promote sustainability in waste management practices.

We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
