

Special Issue

Sustainable Movement Ecology and Wildlife Conservation

Message from the Guest Editors

Movement ecology addresses where, when, and why species move. The incorporation of knowledge on species movements into conservation practice remains challenging, yet promising, especially from the perspective of ecosystem sustainability, as it facilitates our decision making to be more adaptive and flexible. With the rapid advances in monitoring technology and analytical methodologies over the last decade, this field has yielded a huge amount of movement data covering a diverse range of taxa. There is an urgent need to create new criteria for data disposition and interpretation. Meanwhile, the growing public concerns about sustainable development and critical issues such as carbon imprints and climate change also call for updating existing models and theories to make movement ecology more open and influential.

Based on these considerations, we propose this Special Issue entitled "Sustainable Movement Ecology and Wildlife Conservation", aiming to promote scientific communication about the recent advances in perspectives, frameworks, or case studies linking movement ecology and sustainable wildlife management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
