

Special Issue

Challenges and Sustainable Trends in Development Economics

Message from the Guest Editor

Development economics considers sustainable factors with a focus on improving conditions in the world's poorest countries. The field also examines both macroeconomic and microeconomic factors relating to the sustainable structure of developing economies and economic growth. The aim of this Special Issue is to identify challenges and sustainable trends in development economics and offer possible solutions for successfully dealing with them. In this Special Issue, original research articles and reviews are welcome. Research areas may include the following:

- economics of growth and applications to developing countries;
- sustainable education, human capital, and endogenous growth;
- institutions and policies for development and sustainability;
- inequality and development;
- history, expectations, sustainability, and development;
- sustainable labor markets, migration, urbanization, and city growth;
- sustainable family planning, labor force, and income fluctuations;
- sustainable globalization and economic development.

I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
