

## Special Issue

# Renewable Energy Technology and Sustainable Building Research

### Message from the Guest Editors

Over the past few decades, global warming, extreme weather, environmental degradation and resource depletion have posed a major threat to human society. Green and sustainable development has become a worldwide consensus, and many countries have elevated "carbon neutrality" to a national strategy and put forward a bright vision of a zero-carbon future. The use of renewable energy is a fundamental way to eliminate carbon emissions and environmental pollution caused by fossil energy, but the development of renewable energy technology is still facing many challenges, such as economy, stability, industrialization and so on. In addition, buildings are a major consumer of energy, and according to a recent study, the building sector accounts for 40% of greenhouse gas emissions. Therefore, improving the energy efficiency of buildings and the utilization of renewable energy in buildings are important factors for energy conservation and emission reduction, and are also hot research topics nowadays.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
