Special Issue

Plant Fibers in Green Composites: Processing, Properties and Applications

Message from the Guest Editors

This Special Issue elucidates the overall properties of plant fibers in terms of their composition, structure, available sources and classification, along with the properties of the composites derived from those plant fibers. Articles concerning the following topics fall under the scope of this Special Issue:

- Plant fiber extraction methods;
- Surface modification techniques of plant fibers;
- Fiber/matrix interface engineering in plant fiber composites;
- Processing methods of plant fiber composites;
- Plant-fiber-based hybrid composites;
- Mechanical properties of plant fiber composites;
- Thermal properties of plant fiber composites;
- Tribological properties of plant fiber composites;
- Water absorption properties of plant fiber composites;
- Morphological properties of plant fiber composites;
- Lifecycle assessment of plant fibers and their composites;
- Finite element modeling of plant fiber composites;
- Machining and machinability of plant fiber composites;
- Industrial applications of plant fiber composites.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
