# **Special Issue**

# Sustainable Supply Chain and Logistics Management

# Message from the Guest Editors

Academic and corporate interest in sustainable supply chain management (SSCM) has risen considerably nowadays, and the concept of sustainability has been one of the main concerns in logistics. The Special Issue aims to stimulate and promote the development of novel approaches enabling sustainable logistics and supply chain management. We invite you to contribute with original research articles and reviews. The objective is to capture the latest advances regarding the integration of the green logistics and SSCM by contemporary organizations and to investigate the current status and future of sustainable logistical operations from various perspectives. Topics include:

of sustainability
Innovative green logistics solutions
Green transportation, warehousing, and distribution
Green logistics and reverse logistics
Circular economy and closed loop supply chains (CLSC)
Sustainable packaging logistics (SPL)
Sustainability and corporate social responsibility (CSR)

Supply chain design and optimization with consideration

of logistics service providers (LSP)

Applications of digital technologies in sustain

Applications of digital technologies in sustainable logistics and supply chain management

We look forward to your contributions.

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
