

Special Issue

Geographical Information Research for Eco-Environment Sustainable Development

Message from the Guest Editors

Dear Colleagues: Following the rapid development of big data in eco-environment studies, RS has become a well-known technology with the ability of fast data acquisition at large scales. This Special Issue calls for submissions dedicated to RS and GIS technology in eco-environment assessment, mainly on a local and country scale. Papers focused on applications, case studies, and georeferenced data on eco-environment sustainability development are also welcome. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Ecological environmental quality assessment model.
- Spatiotemporal evolution characteristics of ecological environment analysis.
- Ecosystem services assessment.
- Estimation of ecosystem services value.
- Trade-offs and synergies of ecosystem services.
- Land use change monitoring and multi-scenario simulation.
- Analysis of driving mechanisms of ecological environmental change.

I/We look forward to receiving your contributions. Prof.
Dr. / Xiaoi Dai and Zekun Wang

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
