

Special Issue

Microenvironmental Air Pollution Control, Comfort and Health Risk

Message from the Guest Editors

The air pollution of the microenvironment can have a great impact on the health, comfort, and well-being of its occupants. Indoor air pollution is a growing concern, due to the wide variety of sources that contribute to the contamination of spaces. Microenvironmental air pollutants can be generated by both indoor sources (e.g., cooking, cleaning products, smoking, building-related pollutants, furniture) and outdoor sources (e.g. vehicles, industry), whose pollutants can enter into buildings through windows and/or air ventilation systems. Volatile organic compounds (VOCs), carbon oxides (CO₂, CO), benzene (C₆H₆), sulfur dioxide (SO₂), ozone (O₃), oxides of nitrogen (NO, NO₂) and particulate matter (PM) can be considered the main microenvironmental air pollutants. Microenvironmental air pollution can have serious impacts on health, it can contribute to respiratory diseases such as asthma and chronic obstructive pulmonary disease, as well as cardiovascular disease, cancer, and other health problems. This Special Issue considers this context and welcomes original research articles and reviews.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
